Muhammad Rayyan Masroor

FULL-STACK DEVELOPER · AI AUTOMATION ENGINEER

+92 319 520 1013 · rayyanmasroor8@gmail.com · github.com/mrayyan6 · rayyan-masroor-portfolio.vercel.app · Islamabad, Pakistan

Computer Science undergraduate at FAST NUCES who builds and ships production full-stack apps and AI automation for real clients. Delivered two live e-commerce platforms on Next.js + Supabase and a local-first AI lead-generation & outreach pipeline; CodeForces 1300+ and 170+ LeetCode problems solved.

TECHNICAL SKILLS

Languages	C++, C, C#, Python, JavaScript, TypeScript, Java, SQL
Frontend	Next.js, React, TypeScript, Tailwind CSS, HTML/CSS, Swiper.js
Backend & Data	Node.js, Express, FastAPI , PostgreSQL, MongoDB, MySQL, SQLite, REST APIs
AI & Automation	n8n, Make.com, Voiceflow, Flowise, LLM/RAG workflows
Tools	Git/GitHub, Vercel, Docker, Thunder Client

EXPERIENCE

Teaching Assistant — OOP, Data Structures & COAL — Jan 2025 – Present
FASTNUCES, Islamabad

- Mentor 500+ undergraduates across OOP, DSA, and Computer Organization & Assembly; run weekly labs.
- Authored custom problem sets that lifted average lab scores by 15%.
- Coach advanced DSA implementation in C++, connecting theory to production practice.

MIS Development Intern — Jun 2026 – Present
Government ofNigeria

- Building a Management Information System for a government agency's institutional records.
- Designed relational schemas and backend logic for entry, storage, and retrieval with role-based access.
- Shipping public and admin web interfaces to meet government reporting requirements.

SELECTED PROJECTS

AI Lead Generation & Outreach Automation — Startup · 2026

- Built a locally-run, two-stage pipeline (Node.js/Playwright + Python/FastAPI/Ollama) that discovers businesses via Google Maps and enriches leads with zero per-call LLM cost.
- Built a full-stack CRM (Next.js, Supabase/PostgreSQL) as the system of record, with lead pipeline stage derived live from database.
- Automated a 3-step outreach sequencer enforcing daily caps, send gaps, and a content-safety gate, logging every send and refusal for audit.
- Built a separate research workflow: a local LLM scores each lead's website for AI/chatbot opportunities, then drafts a personalized initial outreach email.

Lumberwiz — Full-Stack E-Commerce Platform — Freelance · 2026

- Shipped a production timber-products store on Next.js (App Router) with SSR + SEO for a live client.
- Modeled catalog, orders, and users on Supabase/PostgreSQL with row-level security.
- Built a two-step checkout (COD + bank transfer) with validation and order confirmation.

Khud — AI-Powered Custom Apparel E-Commerce — Client · 2026

- Built a production apparel store (Next.js, React, TypeScript, Supabase) with secure auth and an admin dashboard.
- Created an interactive customizer: upload artwork, add text, preview, and order personalized apparel.
- Implemented checkout, inventory, and email notifications; tuned SEO, a11y, and performance on Vercel.

ACHIEVEMENTS

- **CodeForces 1300+** — consistent Div. 2/3 performer across graphs, greedy, and DP.
- **LeetCode 170+ solved** — medium/hard arrays, trees, and graph traversal.
- **ICPC Speed Programming** — finalist-level execution under timed contest conditions.

EDUCATION

BS Computer Science — FAST NUCES, Islamabad — Expected 2027

Relevant coursework: Data Structures & Algorithms, OOP, Operating Systems, AI, Database Systems, Software Design & Analysis, Web Programming, Parallel & Distributed / High-Performance Computing.
