Muhammad Rayyan Masroor

0319-5201013 |rayyanmasroor8@gmail.com | github.com/mrayyan6 | Islamabad, Pakistan

PROFESSIONAL SUMMARY

Computer Science undergraduate at FAST NUCES (GPA: 3.1) with hands-on experience building full-stack web applications and AI automation workflows. Delivered production-ready projects including an e-commerce platform (Next.js, Supabase) and an intelligent chatbot for a live automotive website. Skilled in React, Node.js, Express.js, and database design, with additional expertise in n8n/Make.com automation pipelines. CodeForces 1300+ rating and 170+ LeetCode problems solved, demonstrating strong algorithmic fundamentals.

EDUCATION

BS Computer Science — FAST NUCES, Islamabad | Expected 2027

GPA: 3.1 | Relevant Coursework: Data Structures & Algorithms, OOP, Operating Systems, AI, Database Systems, Software Design & Analysis, Web Programming, Parallel & Distributed Computing, High Performance Computing

TECHNICAL SKILLS

Languages: C++ (Primary), C, C#, Python, JavaScript, Java, Assembly, SQL

Web & Databases: Next.js, React, Node.js, Express.js, HTML/CSS, Supabase, MongoDB, MySQL, SQLite

AI & Automation: n8n, Make.com, Voiceflow, FlowWise, Intelligent Chatbot Development, Workflow Automation

Tools & Platforms: Git, GitHub, Netlify, Vercel, Lovable, Trello

Core Competencies: Data Structures, OOP, Competitive Programming, Software Design & Analysis, REST APIs

PROJECTS

Lumberwiz — Full-Stack E-Commerce Platform | Freelance Client Project | 2026

- Built a production-grade timber/wood products e-commerce site using Next.js (App Router) with SSR and SEO optimization, deployed for a live client.
- Implemented Supabase as the backend with PostgreSQL, handling product catalog, order management, and user data with row-level security.
- Engineered a two-step checkout flow supporting Cash on Delivery and bank transfer payment methods, with full form validation and order confirmation.
- Integrated Swiper.js carousels, responsive navbar, and contact workflows; conducted full SSR/SEO audit to ensure search engine discoverability.

AI Automation & Intelligent Chatbot Development | Personal / Client Projects | Jan 2026 – Present

- Architected automated business workflows using n8n and Make.com, including a 31-node lead generation pipeline targeting local businesses with AI-generated queries via OpenRouter and Google Places API.
- Engineered a custom AI chatbot agent for a live automotive website, integrating a natural language interface with Netlify's deployment infrastructure for real-time user queries.
- Designed modular workflow components enabling reuse across multiple client use cases, covering scraping, email extraction, Google Sheets storage, and Gmail outreach with rate limiting.

Prison Management System | Academic Group Project | Sep 2025 – Dec 2025

- Delivered a fully functional record management system using JavaFX, JavaSwing, and SQLite, covering inmate intake, scheduling, and administrative workflows.
- Led agile sprint planning and task distribution via Trello, coordinating a 3-member team to hit all milestone deadlines.

GitHub Light — Version Control System | Academic Group Project | Nov 2024 – Dec 2024

- Engineered a miniature local version control system in C++ replicating core Git functionalities: commit history, branching logic, and diff tracking.
- Applied advanced data structure concepts (hash maps, linked lists, file I/O) to simulate real repository state management.

EXPERIENCE

Teaching Assistant — OOP & Data Structures | Lab Demonstrator — COAL | *FAST NUCES Islamabad* | Jan 2025 – Present

- Mentored 500+ undergraduate students in Object-Oriented Programming, Data Structures, and Computer Organization & Assembly Language (COAL).

- Led weekly lab sessions for 500+ students, creating custom problem sets that improved average lab assessment scores by 15% through targeted technical feedback.
- Mentored students on complex DSA implementations in C++ and Java, bridging theoretical concepts with industry-standard coding practices.

Football Coach | *313 FA* | Sep 2023 – Present

- Designed and delivered structured training programs for U12, U14, and U16 rosters, developing tactical awareness and teamwork.
- Demonstrated leadership and communication skills by coordinating schedules, running drills, and providing real-time performance analysis.

MIS Development Intern | *Government of Nigeria* | Jun 2026 – Present

- Developing a Management Information System (MIS) for a Nigerian government agency, covering website development and database management for institutional records.
- Designing relational database schemas and backend logic for data entry, storage, and retrieval with role-based access.
- Building public and admin-facing website interfaces to meet government reporting requirements.

ACHIEVEMENTS & COMPETITIVE PROGRAMMING

- CodeForces: 1300+ Rating — consistent performer in Div. 2 & Div. 3 contests; strong in graph theory, greedy, and dynamic programming.
- LeetCode: 170+ Problems Solved — focusing on medium/hard difficulty arrays, trees, and graph traversal challenges.
- Speed Programming (ICPC): Competitive finalist-level execution speed in timed problem-solving environments.

VOLUNTEERING & LEADERSHIP

Civics & Community Engagement Intern | *Sabawoon (in collaboration with GIZ Pakistan)* | Aug 2024 – Dec 2024

- Delivered technology literacy workshops to elderly community members, simplifying digital tools and bridging the technology access gap in underserved populations.
- Led women's empowerment initiatives focused on vocational and digital skills development.
